14 March 2025

Representing the full European value chain

EU strategic agenda for 2024-2029

Following the European elections in June 2024, the EU has defined **key priorities** to guide its work until 2029.

1

A free and democratic Europe

Upholding democratic values within and globally

2

A strong and secure Europe

Enhancing external action, security and defence, while preparing for a stronger Union

3

A prosperous and competitive Europe

Strengthening competitiveness, driving green and digital transitions, and fostering innovation and a business-friendly environment

Ramping up defense budget

Looming trade war

College of Commissioners 2024-2029

Energy Trilemma

Biogases are well placed to answer all items of the Energy Trilemma.

2040

Biomethane production could supply **85% of gaseous fuels demand**

Is Europe making the same mistakes as before?

- Europe's competitiveness
- Driving down GHG emissions
- Security of supply

However, no clear support for biogases yet

Some critical issues

- Full recognition and support
 - Targets on biogases
 - Menion as a means for affordable energy
 - European Decarbonisation bank
- Speeding up the developments as Europe's own resource
 - Derisk investments in clean technologies
 - Establishing lead markets with biogases
 - Speeding up permitting
 - Establishment Renewable Acceleration Area's
- Circular economy and agriculture
 - Digestate to be safely used with right agronomic practices >170 kg N
 - Inclusion of low-carbon and recycled nutrients as part of achieving
 - climate neutrality
